## INSTRUCTIONS FOR COMPLETION OF THE SPECIAL WASTE DISPOSAL FORM

As a **generator**, you should complete all or part of sections I, II, III, IV, VI, and VII.

As a **landfill operator**, you should complete all or part of sections I, IV, V and VII.

The following instructions correspond with the numbering system on the disposal form:

### I. GENERAL INFORMATION

This may be completed by the generator or the landfill operator. Please be certain to include the disposal-area permit number and the person we could contact if questions should arise.

### II. WASTE CHARACTERIZATION (To be completed by the generator)

- A. Provide the name of the waste, i.e., fly ash, paint sludge, etc.
- B. Describe the process or activity that produced the waste.
- C. Indicate the physical state of the waste by checking one of the numbered blanks 1 through 5. Also include the pH, the percentage of solids by weight and other information as requested.
- D. Indicate whether this waste was **ever** classified or listed as hazardous. If so, and your firm was the generator, give the previous EPA waste identification number for the waste (D001, D002, etc.).
- E. List the components of the waste and their percentage of the total weight of the waste. If a lab report or analysis is available, attach a copy to the form.
- F. Indicate the source of the data listed in this section, such as your firm's lab, an independent laboratory, or manufacturer's specifications.

### III. GENERATION RATE/DISPOSAL FREQUENCY (To be completed by the generator)

- A. Indicate the average **generation** rate for the waste.
- B. Indicate if the request is for a **one-time** disposal or for **continuous** disposal, by completing (1) or (2).
  - (1) Indicate the quantity of waste and the frequency with which it will be taken to the landfill for disposal. In addition, indicate the amount of any waste which has been stored and will immediately be taken to the landfill for disposal.

**OR**

- (2) Indicate the total amount of waste for a one-time disposal.

### IV. TRANSPORTATION (To be completed by transporter or landfill operator)

- A. Check one of the five options to indicate the type of containers to be used in transporting the waste to the disposal site. Also indicate the size of an individual container of that type.
- B. Check one of the four options to indicate the mode of transportation to be used for the waste.

V. DISPOSAL TECHNIQUES (To be completed by the landfill operator)

- A. If the waste is to be buried in a trench separate from the other wastes, indicate that by checking this blank.
  - 1. Describe where the separate disposal area is located on the landfill.
  - 2. Indicate whether the separate trench design has been approved by DNR, either during the original permit approval or by later amendments to your operating procedure.
- B. If the waste is to be combined with municipal wastes and deposited on the active working face, indicate by checking this blank.
  - 1. Also show the average daily quantity of municipal solid waste received at the disposal facility.
  - 2. Indicate whether the waste is to be deposited at the top or the toe of the working face.
- C. If neither trench burial nor co-disposal is to be used, describe the proposed alternative disposal method.

VI. HANDLING PROCEDURES (To be completed by the generator)

Describe the precautions necessary to safely handle the waste. Also list other materials that should be isolated from the waste.

VII. CERTIFICATION (To be completed by generator and landfill operator)

Read the certification statement carefully, then sign and date the form. Print or type your name below your signature.

We encourage you to make any suggestions or comments you may wish in the space provided or by attaching additional sheets.
